

WEBINAR ON BEST PRACTICES IN PEER REVIEW OF SCIENTIFIC PUBLICATIONS

February 21-22, 2022

9:00AM – 5:00PM via ZOOM

A scientific researcher stands at the bar of two judges - the peer reviewers, whose judgment endorses the paper for final review; and the editorial board who serves as an oversight to do the final judgment for inclusion in the current volume for publication. A researcher who is trained as a peer reviewer can visualize what the actual peer reviewers will be looking into the paper. So it matters that when you write, you are also complying what the reviewers will require you. This situation is a strategic advantage for your paper to get a better chance of hurdling the peer review process.

The International Association of Scholarly Publishers, Editors and Reviewers (IASPER) with the SEC Registration No. CN201433407 is inviting you to participate in the Webinar on Best Practices in Peer Review of Scientific Publications that will be staged on February 21-22, 2022.

The webinar objectives are to:

1. acquire competencies in peer reviewing Qualitative and Quantitative Scientific Articles;
2. learn the basis of acceptance and rejection of articles;
3. write the Peer Review report;
4. differentiate, reviewing standards for multidisciplinary research papers and discipline specific journals; and
5. evaluate editorial policies, editors and journal impact as requisites for acceptance of peer review invitation.
